PROFILE

Creative Tech Explorer and B.Tech CS student passionate about building impactful solutions at the intersection of AI, automation, and design. Demonstrates strong initiative in taking projects from concept to prototype, blending technical depth with modern aesthetics. Seeking collaborative opportunities to deliver real-world value through technology.

PROJECTS

Project-HELIOS

Home Server Project

- Built a secure locally hosted personal cloud platform using Nextcloud for file sync/backup.
- Developed a smart home dashboard (Home Assistant, Grafana) to automate IoT device control.
- Prototyped an AI-powered assistant integrating local models (LLaMA, Whisper) for voice and automation.

Freelance Graphic Designer

DESTINY ENVIRO Solutions

- Logo, brand identity, posters, digital graphics for small businesses.
- Enhanced client profiles and social engagement through tailored visuals.
